13" Dodge Modular Clutch Kits That Include Flywheel					
Year	Engine Size	Kit Number	Cover Assembly	Pressure Plate Load	Maximum Torque
1994-01	5.9L Cummins	05-901SR100	361944	3500	600 ft-lbs
1994-01	5.9L Cummins	05-901SR200	361944	3500	700 ft-lbs
1994-01	5.9L Cummins	05-901SR300	361944	3500	800 ft-lbs

*These kits must be matched with flywheel number 167432 in 1994-97 applications. The early Dodge flywheel is not compatible with these clutch kits. Failure to replace the flywheel will void your warranty. These applications may also be upgraded to the modular clutch design, listed above. Instead of a 12-1/4" outside diameter, please note that the modular design utilizes a 13" pressure plate and disc with an alternative replacement flywheel.

**These kits are designed for wreckers and/or similar applications where the driveline will encounter intermittent high torque spike loads. The OEM clutch disc is designed to fail if a torque spike exceeds a preset limit. Although the overall torque rating is the same as stock, the spike torque rating is substantially higher.

For detailed information on horsepower/torque ratings or other data on specific kits please contact our technical service department at 800.528.6743.
