

National[®] Oil Seals

National[®] Oil Bath Seals 37 Series

“Red” 37 Series Seal Design

**“Red” 37 Series —
The Most Dependable Point
Contact Seal in the Market!**

- Offers superior contaminant exclusion, reduced friction build-up and longer life than other wheel seals in its price range
- Single spring-loaded sealing lip provides four points of contact for additional protection against contaminants and leaks
- Constructed of tough, abrasive-resistant nitrile — the lowest-cost, most oil-resistant elastomer available

- A** Single spring-loaded sealing lip provides main contact point reducing shaft interference.
- B** Unitized construction provides greater structural integrity and reduces possible leak points.
- C** Unique rubber I.D. and O.D. seal includes patented SURE-LOCK[®] I.D. rib, preventing bore and shaft leaks and contamination.
- D** Metal O.D. maintains position on hub bore.
- E** Four contact points act as a barrier for additional protection.
